**Avia Health Informatics Plc
("Avia" or the "Company")**

Odyssey TeleAssess sale in the USA to GuardMi

Avia (AIM: AVIA), the AIM-listed developer and provider of clinical decision support systems, is pleased to announce it has signed a one year contract with GuardMi in the USA for the supply of multiple Odyssey TeleAssess licences.

GuardMi is an Ohio based company that operates a Medical Call Centre; GuardMi will be using Odyssey TeleAssess immediately from launch in September. The Odyssey software will also be hosted in a Cloud server.

The contract value is \$104,000 and although modest in terms of the Company's annual turnover, this direct sale represents an important strategic contract win. Although other US clients are already using Odyssey products, this contract represents the first US sale since the inception of Avia's US business Avia Health Informatics, Inc. in early 2011.

Barry Giddings, Executive Chairman of Avia, commented:

"We are excited to have secured another sale in the US, which is important marketplace. We are also looking forward to working with and supporting GuardMi in the set-up of their new call centre operation."

Julian Mendoza, CEO of GuardMi, commented:

"We are looking forward to using the Odyssey TeleAssess system in our call centre as, in comparison to competitor products, we found it to have a clean, elegant and user-friendly layout and we have received excellent support from Avia and look forward to working together with them."

About Avia Health Informatics Plc

Avia is a developer and provider of clinical decision support systems. Its Odyssey product range is used by clinicians and non-clinicians in various environments around the world to provide effective healthcare support, increasing the levels of patient care while delivering operational efficiencies. The delivery of Odyssey can be in a static or mobile environment from a PC, laptop, tablet or mobile device, with clinical content, training and services delivered via the web. The groups other product, PathFinderRF offers on-line referral facilitation to manage the quality of referrals.

Avia's partners provide market reach into geographies outside of the UK, including the United States and Australia.

The Odyssey range is built on a common medical content database which has been developed over the past 15 years. Odyssey is continually updated, tailored with question and answer sets and has a user interface adapted for the particular user groups and the environment in which it is used.

Environments include prisons, ships, call centres, GP out of hours, walk in centres, care homes, pharmacies and other clinical and non-clinical environments.
