

8 March 2011

**Avia Health Informatics plc
("Avia" or "the Company")**

Subscription to Raise up to £0.60 million

Avia is pleased to announce that it has raised approximately £600,000 before expenses through a subscription of up to 1,200,000 new ordinary shares (the "Subscription Shares"), at a price of 50 pence per share (the "Subscription Price"), with both existing shareholders and new investors (the "Subscription"). The Subscription Price represents a discount of 14 per cent. to the middle market closing price of 57.0 pence per Ordinary Share on 7 March 2011, the last business day prior to this announcement.

The proceeds of the Placing will be used to fund initiatives for international growth, including:

- internationalising the Odyssey product software for new markets, including localisation of clinical content and development of e-learning tools;
- building our existing and developing new routes to market, including with channel partners, including associated working capital; and
- completing further enhancements of the technology platform to promote cloud-enabled hosting and delivery to smart phones and other mobile devices.

The Subscription is conditional, inter alia, on admission of the Subscription Shares to trading on AIM, which is expected to become effective on 11 March 2011. Following the issue of the Subscription Shares, the total number of shares in issue will be up to 6,483,583.

Application has been made to the London Stock Exchange for the Subscription Shares to be admitted to trading on AIM. The Subscription Shares will, following allotment, rank pari passu in all respects with the existing issued Ordinary Shares. The Company will inform shareholders, via a Total Voting Rights announcement, of the total number of shares in issue following admission of the Subscription Shares.

Avia's Executive Chairman, Barry Giddings, commented:

"This fundraising follows a variety of positive news items from Avia, including the recently concluded Odyssey CareAssess reseller contract, the launch of the mobile delivered product Odyssey RemoteAssess, the development of 3G and cloud-enabled delivery channels and a number of contract wins and renewals.

The subscription gives Avia a stronger position from which to promote its expanding Odyssey product range to a wider international audience. Avia's strategy is to leverage its scalable technical platform to deliver clinical content on multiple devices, across multiple geographies, to promote cost effective access to primary healthcare. Avia looks forward to rewarding its supportive shareholders with further growth."

About Avia Health Informatics Plc

Avia is a developer and provider of clinical decision support systems. Its Odyssey product range is used by clinicians and non-clinicians in various environments around the world to provide effective pre-diagnostic healthcare support, increasing the levels of patient care while delivering operational efficiencies. The delivery of Odyssey can be in a static or mobile environment from a PC, laptop, tablet or mobile device, with clinical content, training and services delivered via the web.

Avia's partners provide market reach into geographies outside of the UK, including the United States and Australia.

The Odyssey range is built on a common medical content database which has been developed over the past 15 years. Odyssey is continually updated, tailored with question and answer sets and has a user interface adapted for the particular user groups and the environment in which it is used.

Environments include prisons, ships, call centres, GP out of hours, walk in centres, care homes, pharmacies and other clinical and non-clinical environments.
