**Avia Health Informatics Plc
("Avia" or the "Company")**

Odyssey available on 3G and new mobile devices

Avia (AIM: AVIA), the AIM-listed developer and provider of clinical decision support systems, is pleased to announce the following:

- Odyssey clinical decision support now available via 3G networks
- Odyssey now deployable mobile touchscreen devices

The Odyssey clinical decision support is now available via 3G networks, enabling countries and regions with limited connectivity through Wi-Fi, or other connection options, to enjoy the benefits of the Odyssey product software range.

In addition, Odyssey is now available on various mobile touchscreen devices including the Zoostorm SL8 slate, Panasonic Tough book, Dell XT2 laptop, and Arbour M1040, enabling the delivery of Odyssey in a mobile environment.

These developments continue to open up the international market for Avia's clinical decision support solutions and will create new opportunities for Avia's various MobileAssess products including Odyssey MarineAssess, Odyssey CareAssess and Odyssey VillageAssess.

Barry Giddings, Executive Chairman of Avia, commented:

"The availability of Odyssey via 3G networks and on rigorously tested mobile devices is an exciting step forward for Avia, increasing the number of vertical markets and geographies in which Odyssey can be deployed. With this increased accessibility and the proven ability of our software to improve the efficiency of clinical resources and reduce risk, we believe Avia is well-positioned to meet the increasing global need for access to healthcare."

About Avia Health Informatics plc

Avia is a developer and provider of clinical decision support systems. Its Odyssey product range is used by clinicians and non-clinicians in various environments around the world to provide effective pre-diagnostic healthcare support, increasing the levels of patient care while delivering operational efficiencies. The delivery of Odyssey can be in a static or mobile environment from a PC, laptop, tablet or mobile device, with clinical content, training and services delivered via the web.

Avia's partners provide market reach into geographies outside of the UK, including the United States and Australia.

The Odyssey range is built on a common medical content database which has been developed over the past 15 years. Odyssey is continually updated, tailored with question and answer sets and has a user interface adapted for the particular user groups and the environment in which it is used.

Environments include prisons, ships, call centres, GP out of hours, walk in centres, care homes, pharmacies and other clinical and non-clinical environments.
