

21<sup>st</sup> February 2011

**Avia Health Informatics Plc  
("Avia" or the "Company")**

**The launch of Odyssey RemoteAssess in Mobile product range**

Avia (AIM: AVIA), the AIM-listed developer and provider of clinical decision support systems, is pleased to announce the launch of Odyssey RemoteAssess, another software product in our mobile range.

Odyssey RemoteAssess offers clinical decision support designed specifically for remote locations, ensuring the best possible care and advice for people worldwide who lack access to a fully trained doctor or nurse. By supporting those with responsibility for health and safety in these environments, Odyssey RemoteAssess ensures rapid, safe assessment and advice despite the remote nature of a location.

The Odyssey Mobile product range leverages the Company's core clinical content database, using mobile connectivity through a tailored interface, to provide cost-effective access and efficiency benefits to healthcare providers and recipients. Avia will sell Odyssey RemoteAssess and the other products in the Odyssey Mobile product range globally through its expanding international reseller network.

**Barry Giddings, Executive Chairman of Avia, commented:**

*"The Odyssey RemoteAssess extension to the Odyssey Mobile range, which is designed to work with state of the art touch screen technology, will enable us to build sales in our target markets in the UK and internationally."*

**About Avia Health Informatics plc**

Avia is a developer and provider of clinical decision support systems. Its Odyssey product range is used by clinicians and non-clinicians in various environments around the world to provide effective pre-diagnostic healthcare support, increasing the levels of patient care while delivering operational efficiencies. The delivery of Odyssey can be in a static or mobile environment from a PC, laptop, tablet or mobile device, with clinical content, training and services delivered via the web.

Avia's partners provide market reach into geographies outside of the UK, including the United States and Australia.

The Odyssey range is built on a common medical content database which has been developed over the past 15 years. Odyssey is continually updated, tailored with question and answer sets and has a user interface adapted for the particular user groups and the environment in which it is used.

Environments include prisons, ships, call centres, GP out of hours, walk in centres, care homes, pharmacies and other clinical and non-clinical environments.
