Avia Health Informatics Plc
("Avia" or "the Company")

**Additional Odyssey products to be used by
Nottingham Emergency Medical Services**

Avia (AIM: AVIA), the developer and provider of clinical decision support systems worldwide, announces that its subsidiary, Plain Healthcare Limited ("Plain"), has been awarded two additional contracts by Nottingham Emergency Medical Services ("NEMS") for its Odyssey FaceToFace and Odyssey Reception clinical decision support tools.

These products will be used in NEMS' new Health Centre which opened on the 25 January this year. NEMS already use Odyssey TeleAssess at their Out-Of-Hours centre and based on the results experienced at this centre have chosen to use Odyssey at their new site.

NEMS took the decision to purchase two new Odyssey FaceToFace and Odyssey Reception products due to the fact these products can be used by employees with a varied skill mix which is present at the new site. The Odyssey products will also allow accurate and contemporaneous record documentation to be produced which is critical to NEMS and its patients.

Julie Bailey, Lead Nurse, NEMS stated:

"We have chosen Odyssey FaceToFace to ensure rapid, safe consultation of our non-registered patients. Odyssey Reception will also allow us to prioritise our walk-in patients at both sites to make sure they are seen by clinical priority, so reducing clinical risk and improving patient care."

Barry Giddings, Chairman, Avia Health Informatics commented:

"This is another excellent strategic contract win. We look forward to working with and supporting NEMS in the rollout and use of all of the Odyssey products the organisation is now using across its sites."

Notes to editors

Avia Health Informatics Plc was admitted to trading on AIM on 16 November 2009 having completed a reverse takeover of The Plain Software Company Limited ("Plain"). It is Avia's intention to grow the business both organically and by acquisition.

The Company produces a range of clinical decision support products under the Odyssey brand:

- **Odyssey TeleAssess** which supports telephone triage by nurses and the provision of up-to-date self care advice; is also used to manage demand for clinical services in an efficient manner. Used by GP out of hours services, GP surgeries in-hours, ambulance trusts and the MoD.
- **Odyssey FaceToFace** is used by nurse-led clinics such as NHS Walk-in Centres, GP-led Health centres, Polyclinics, primary care centres and practices staffed by varying nurse grades. It's also used in prisons.
- **Odyssey Reception** is utilised by non-clinical staff to prioritise patient queues and identify potential emergencies quickly and safely. It may be used by receptionists throughout primary care services.
- **Odyssey Gold** a state-of-the-art combination product comprising some or all Odyssey variants: Reception, TeleAssess and FaceToFace merged into one, seamless solution.
- **Odyssey eCover** allows health managers to commission health workers to work from home to provide emergency cover when needed. Securely held on N3 servers, its sophisticated security system allows access via domestic broadband.
- **Odyssey FirstAssess** is being developed specifically for use in the Prison service to help improve healthcare in this challenging environment.

Odyssey products interact with leading GP patient administration systems and other key systems used by the NHS.
