**Avia Health Informatics Plc
("Avia" or the "Company")**

New reseller appointed to sell Odyssey product range in Canada

Avia (AIM: AVIA), the developer and provider of clinical decision support systems, is pleased to announce the appointment of a new Canadian reseller, The Stevens Company Limited ("Stevens"), to sell the Odyssey range in Canada:

Stevens services the health care sector in Canada and they are committed to the supply and maintenance of functional and accessible clinical information solutions and platforms in Canada. They support clients in delivering systems that can improve overall care quality and financial performance, which now includes Odyssey.

Bill Carson, Vice President of Sales and Marketing for Stevens, commented:

"Stevens is delighted to be appointed as an Avia reseller. We are always looking for companies with a distinctive track record in the development of high quality clinical solutions that can support clinicians and health practitioners' decision making..."

Barry Giddings, Chairman for Avia, commented:

"We are very pleased to have Stevens on board as our reseller in Canada and we are confident by continuing to build our international reseller network this will lead to further global sales of the Odyssey product range."

About Avia Health Informatics Plc

Avia is a developer and provider of clinical decision support systems. Its Odyssey product range is used by clinicians and non-clinicians in various environments around the world to provide effective pre-diagnostic healthcare support, increasing the levels of patient care while delivering operational efficiencies. The delivery of Odyssey can be in a static or mobile environment from a PC, laptop, tablet or mobile device, with clinical content, training and services delivered via the web.

Avia's partners provide market reach into geographies outside of the UK, including the United States, Europe, Africa and Australia.

The Odyssey range is built on a common medical content database which has been developed over the past 15 years. Odyssey is continually updated, tailored with question and answer sets and has a user interface adapted for the particular user groups and the environment in which it is used.

Environments include prisons, ships, call centres, GP out of hours, walk in centres, care homes, pharmacies and other clinical and non-clinical environments.
